

Animals in Winter Activity Card

Dear Families - Animals in Winter gives children a chance to learn about the different ways that animals behave in the cold winter months when foods are less plentiful. For this activity, you and your child will need to cut the pictures from the bottom of this page and decide in which of the four boxes the picture belongs. Show your child that if we cannot remember, we can look back in the book to decide. You can either paste the pictures in the boxes or save them in an envelope marked Animals in Winter so your child can play this game again.

<i>Animals that fly to warmer places</i>	
<i>Animals that hibernate</i>	
<i>Animals that gather and save food</i>	
<i>Animals that must hunt for food all winter</i>
