

Eating Fractions Activity Card

Dear Families - Young children work hard at learning to share. An important idea that is part of sharing is how to divide an item into equal parts, what we call fractions. To complete this activity card, your child will need to watch you cut certain food items into equal parts and then eat one of those parts. Be sure to record the date you two completed each eating task!

Food to Divide	Date	Help Your Child Say...
		"I ate one-half of an egg."
		"I ate one-third of a banana split."
		"I ate one-third of a muffin."
		"I ate one-half an apple."
		"I ate one-fourth of the pizza."
