

Houses and Homes Activity Card

Dear Families - Houses and Homes gives children a chance to see the many different kinds of houses that people live in all around the world. For this activity, you and your child will need to look in the book until you find the page where the house in the picture can be found. When you do, record the page number in the column on the right hand side. Remember to talk to your child about the type of house that YOU live in!
